

**Freedom of Information request reference number:** 6502.1

**Date of response:** 04/05/2022

**Request:**

*During the London floods on 12 July 2021, I would like to know whether the London Fire Brigade attending the Woodstock Grove and Richmond Way streets in W12, had to open a sewer or other pipe to release water that was rising in basements in the area.*

*I would like to know what exactly was the Fire Brigade's role in the release of the flood waters in the basements in these 2 streets. In the alternative, is the London Fire Brigade aware of what caused the flood waters to recede so quickly even though it was still raining quite heavily at the time?*

**Response:**

The LFB record very little information about special service (non-fire incidents) and do not capture flooding data in the same way as we do for fire related incidents.

We do not hold the information you have specifically requested however, information about all incidents attended by the LFB is published online via the London Datastore: <https://data.london.gov.uk/dataset/london-fire-brigade-incident-records>.

The tables below summarises the information recorded on the published records (accessible via the link above) for the flooding incidents attended at Woodstock Grove and Richmond Way, W12 on 12 July 2021:
