Freedom of Information request reference number: 6642.1

Date of response: 22/07/2022

Request:

Eastway Tunnel is an asphalted street with a maximum speed of 40 mph with two lanes in London Borough of Hackney. Would it be possible to know if there have been any reported fires and RTCs attended in these tunnels from your mobilising system within the last 10 years if available?

Response:

In response, our Data team have provided the list below of fires and special service (RTC) incidents found 200m of East Way Tunnel within the last 10 years.

Please note that tunnels incidents are usually associated with more than one postcode or address. Therefore, the search is not always 100% accurate and we may have missed some other incidents that have been recorded differently.

We have dealt with your request under the Freedom of Information Act 2000. For more information about this process please see the guidance we publish about making a request [on our website](#).
