

Freedom of Information request reference number: 6638.1

Date of response: 22/07/2022

Request:

I am currently undertaking a fire risk assessment on Hanger Lane Tunnel. The Hanger Lane gyratory is a multi-lane rectangular gyratory – having the Hanger Lane underpass, under its southern limb, for Western Avenue (A40). Would it be possible to know if there have been any reported fires and RTCs attended in the tunnel from your mobilising system within the last 10 years if available?

Response:

Please see the table below which details fires and special service (RTC) incidents attended to within 200m of Hanger Lane Tunnel within the last 10 years. Please note that tunnel incidents are usually associated with more than one postcode or address, therefore some incidents may not have been captured if they were recorded differently.
