

Freedom of Information request reference number: 7281.1

Date of response: 30 March 2023

Request:

- *How many times per year since 2010 has LFB attended the landfill site known as Launder's Lane or Arnold's Fields since 2010.*
- *How many recorded incidents have taken place there (if these are longer fires such as one week long please furnish the information in the way that may be most convenient for LFB), please specify the type of incident.*
- *Are there any gradings to the level of incident e.g. major moderate? Were any additional resources required such as water towers? How many firefighters were in attendance on each occasion?*
- *What is the approximate annual cost to the LFB since 2010 of attending incidents?*
- *Please provide any information held which may touch on the cause of each fire.*

Response:

Please see my response to your queries below:

How many times per year since 2010 has LFB attended the landfill site known as Launder's Lane or Arnold's Fields since 2010.

The LFB have conducted 224 station visits (site visits) to Launder's Lane/Arnold's Fields since 01 January 2010. The table below shows the address that these visits have been recorded against. Not all of these visits may have included the landfill site known as Launder's Lane or Arnold's Fields (as it is my understanding that crews may visit more than one site during a station visit):

Any visits that specifically related to the landfill site known as Launder's Lane or Arnold's Fields would have been recorded on the Operational Risk Database (ORD) entry for the location. We recently published an EIR response on our website which includes a copy of the ORD entry for the site:

https://www.london-fire.gov.uk/media/7409/72451_response.pdf

How many recorded incidents have taken place there (if these are longer fires such as one week long please furnish the information in the way that may be most convenient for LFB), please specify the type of incident.

In order to locate the incidents attended at the landfill site known as Launder's Lane or Arnold's Fields since 2010, I searched the record of all incidents attended by the LFB that were within a 1000m radius from a mid-point on Launder's Lane. I filtered by outdoor fires (grassland, woodland and crops, other outdoors (including land) and outdoor structures).

The table below shows the number of incidents attended where the property type is recorded as a 'landfill site' or 'refuse/rubbish tip' since 01 January 2010:

Year	Property Type	Incident Type	Number of Incidents Attended
2022	Landfill site	False Alarm	51
		Fire	30
2021	Landfill site	False Alarm	1
		Fire	9
2020	Landfill site	False Alarm	1
		Fire	8
	Refuse/rubbish tip	False Alarm	1
		Fire	1
2019	Landfill site	False Alarm	1
	Refuse/rubbish tip	Fire	1
Total			104

For completeness, the table below shows the number of incidents attended at other property types in the same area, which could be related to Launder's Lane or Arnold's Fields site but the property type may have been recorded differently on the incident management system:

Year	Property Type	Incident Type	Number of Incidents Attended
2022	Grassland, pasture, grazing etc	False Alarm	1
		False Alarm	3
	Heathland	Fire	4

	Loose refuse	False Alarm	7

*Are there any gradings to the level of incident e.g. major moderate?
Were any additional resources required such as water towers?
Please provide any information held which may touch on the cause of each fire.*

Of the 102 fires listed in the two tables above, 23 are recorded as 'Primary Fires' and 79 are recorded as 'Secondary Fires'.

Categories of fires

A reportable fire is 'an event of uncontrolled burning involving flames, heat or smoke which was attended by a fire and rescue authority, or which was a late fire call'.

Fires are categorised as either Primary, Secondary, Chimney or Late Call.

Primary fires are more serious fires that harm people or cause damage to property. More information is collected about primary fires than other types of fire. In the changes to the FDR1 in 1994 the definition for primary fires was broadened to include a small number of fires where there was no fire damage but there was damage from heat and smoke.

Primary fires have one or more of the following characteristics:

- a) all fires in buildings and vehicles that are not derelict or in outdoor structures,
- b) (b) any fires involving casualties or rescues,
- c) (c) any fire attended by five or more appliances.

Secondary fires are less serious fires and less information is recorded about these fires. Secondary fires are the majority of outdoor fires including grassland and rubbish fires; unless they involve casualties or rescues, property loss or unless five or more appliances attend. Fires in derelict buildings are recorded as secondary fires.

Where fire crews record the motive for a fire they are categorised as follows:

- (a) Accidental fires, including those where the cause was not known or unspecified.
- (b) Deliberate fires, include those where deliberate ignition is merely suspected.

The table below shows a breakdown of the 102 fires, including main cause or fire/ignition source and motive for the fire.

Please note, main cause or ignition sources are not recorded for secondary fires.

We do not record if additional resources (water towers) are used on the Incident Management System. I have, however, included details of the main action taken by the attending crews which you may find useful:

Row Labels	Motive	Main Action Taken	Main Cause of Fire	Ignition Source	Number of incidents

How many firefighters were in attendance on each occasion?

What is the approximate annual cost to the LFB since 2010 of attending incidents?

I have included a list of the 184 incident numbers to this response. You can use the incident numbers to cross reference information the LFB already publish online and obtain details on the resources in attendance and notional cost of the incidents.

The LFB publish the details of every incident responded to since January 2009 online. Information is provided for when and where the incident happened, and the type of incident dealt with, and can be accessed through the London Datastore: <https://data.london.gov.uk/dataset/london-fire-brigade-incident-records>.

The most recent information (for incidents that have occurred in last three years), can be downloaded via the Excel spreadsheet '[LFB Incident data - last three years](#)'

The information for earlier years can be downloaded via the csv. file located [here](#).

The number of pumps (fire engines) attending can be located in columns 'AI' to 'AJ'. The number of hours each pump attended can be found in column 'AK'.

The notional cost of the LFB attending the incident can be found in column 'AL'.

We also publish details of the normal crewing levels for each main type of LFB appliance on our website here: <https://www.london-fire.gov.uk/media/5958/staffing-and-riders-at-fire-stations-september-2021.pdf> (which can be used in conjunction with the attending pump data on the incident records to give you the number of firefighters in attendance at the incidents).

We have dealt with your request under the Freedom of Information Act 2000. For more information about this process please see the guidance we publish about making a request [on our website](#).
