

Freedom of Information request reference number: 8486.1

Date of response: 3 April 2024

Request:

I am conducting research on behalf of the Institute of Occupational Safety & Health 's (IOSH) Fire Risk Management Group into the number of car fires that London Fire Brigade attended between the years 01 January 1995 – 31 December 2023 (inclusive). I have particular interest in those fires occurring within multi-storey car parks. I would be grateful if the information could show:

- The type of fuel in the vehicle of origin (e.g., petrol, diesel, Hybrid or electric)
- The number of cars affected by such fire in each year
- The number of fires that resulted in, and the degree of, injury in each year
- Any reports following investigation into those fires.

Response:

Please see the below table with the number of car fires in Multi storey car parks. This is information we hold on incidents recorded since 2009. To obtain this number we used the UPRN to locate the address and the below are the incidents it was able to pick up using the UPRN

I have also attached a spreadsheet with the details of each incidents. This includes the incident numbers date of incident and fuel type of vehicle if recorded.

You may also find the reports we publish on the <u>London DataStore</u> of interest. The <u>Incident Report</u> details all the incidents attended by London Fire Brigade since 2009.

We have dealt with your request under the Freedom of Information Act 2000. For more information about this process please see the guidance we publish about making a request on our website
