Textphone 020 7960 3629
london-fire.gov.uk

Freedom of Information request reference number: 7962.1

Date of response: 02 October 2023

Request:

Could you please provide data regarding the total number of vehicle fires which have been attended by the LFB for the most recent 5 years where data is available (as of Oct 2023), broken down by the following categories (where available).

- * Vehicle fuel type (i.e. petrol, diesel, hybrid, full EV)*
- * Vehicle Manufacturer and/or model*
- * Vehicle colour*
- * Location (e.g. public carriageway, private car park, private driveway, etc).*

If some of this data is unavailable, please provide as many of the breakdowns as is possible for each given year or period. Please provide the categorisation for each of these fields as is recorded in the LFB data systems with descriptions of these categorisations in your response so that the data may be interpreted appropriately.

Response:

Please find attached table showing the total number of vehicle fires attended by the LFB in the last five years (to date).

The table includes:

- Year
- Vehicle fuel type (i.e. petrol, diesel, hybrid, full EV): recorded as 'VehiclePowerType' in our Incident Management System (IMS).
- Vehicle Manufacturer and/or model: recorded as 'VehicleManufacturer' and 'Vehicle Model' in our IMS*.
- Number of incidents attended

**Please note, where known, the manufacturer and model of the vehicle is included by the attending crews although, this is added as free text so there may be errors in spelling, etc. Where the field was left blank on the IMS, I have changed the entry to read "Not recorded on IMS (Incident Management System)".*

We do not record the colour of the vehicle so are unable to provide this information.

Please see further details below in relation to the location data:

Location data

We publish details of every incident attended by the London Fire Brigade since 1 January 2009. This information can be accessed via the following link:

<https://data.london.gov.uk/dataset/london-fire-brigade-incident-records>

We record the address of incidents attended but we do not record a breakdown of the address by categories such as public carriageway, private car park, private driveway, etc

If you download the incident data spreadsheets accessible via the link above, you can see the address and address qualifier recorded for vehicle fire incidents by sorting by the following:

Column F '*IncidentGroup*' to '*Fire*', column I '*PropertyCategory*' to '*Road Vehicle*'. You will see the '*AddressQualifier*' in column K that details location of actual incident relevant to recorded '*PropertyType*' in column J. Address information is recorded in columns L-AA.

We have dealt with your request under the Freedom of Information Act 2000. For more information about this process please see the guidance we publish about making a request [on our website](#).
