

#### Freedom of Information request reference number: FOIA 8028.1

#### Date of response: 17<sup>th</sup> November 2023

#### **Request:**

Under the FOI request is it possible to tell me your staffing levels at each station what they are and what they should be and also your appliance allocation what they are and what they should be.

#### **Response:**

#### Staff levels and Appliances.

Our staffing levels are allocated in the table below showing the stations and the level of staff in each one on Page 2-4.

On page 4 and 5 you will find our appliance crewing and fire station staffing.

We have dealt with your request under the Freedom of Information Act 2000. For more information about this process please see the guidance we publish about making a request <u>on our website</u>.

# Appliance crewing and fire station staffing

## Normal crewing of main appliance types

The normal crewing levels for each main type of LFB appliance is as follows:

Type of appliance	Normal riders	
Pump Ladder	5	
Pump	4	
Aerial (Turntable Ladder, Hydraulic Platform, Aerial Ladder Platform)	2	
Fire Rescue Unit (FRU)	4	
Command Unit (CU)	3	
Fireboat	5	
Operational Support Unit (OSU)	1	
Fire Investigation Unit	1	

## Fire station staffing

We determine the actual numbers of staff required at each station depending on the 'normal riders' for different appliances based at each station and taking account of staff when on leave, sick, or undertaking training.

On the LFB website there are example structure charts for three types of fire station which provide some general information about the numbers of staff required for four watches at each station:

- A fire station with one fire engine <u>here</u>.
- A fire station with two fire engines here.
- A fire station with two fire engines, and two special appliances here.

The combination of fire engines and special appliances gives rise to the following watch staffing at fire stations (as summarised in this table).

Appliances at each station	On each watch				Total for
	Station Officer	Sub Officer	Leading Firefighter	Firefighter	each watch
2 x fire engine, 1 x Aerial, 1 x Fire Rescue Unit (FRU)	1	1	4	16	22
2 x fire engine, 1 x FRU	1	1	3	15	20
1 x fire engine, 1 x Aerial, 1 x FRU	1	1	3	12	17
2 x fire engine, 1 x Aerial	1	1	2	11	15
1 x fire engine, 1 x FRU / 2 x fire engine, 1 x OSU	1	1	2	10	14
2 x fire engine	1	1	2	8	12
1 x fire engine, 1 x CU	1	1	3	6	11
1 x fire engine, 1 x OSU	1	1	2	7	9
1 x fire engine	0	1	1	5	7

\* excludes Station Commander

## LFB operational and non-operational vehicles

The LFB publish a fleet list online via the London Datastore <u>here</u>. We do not publish the numbers of different appliances located at each fire station. This fleet list provides details of our large number of emergency (operational) and non-operational vehicles. There is <u>no</u> identifier in this that will tell you at which fire station a specific appliance is located.
