

**Freedom of Information request reference number:** 8943.1

**Date of response:** 28/08/2024

**Request:**

*Please can you provide information regarding the following where available:*

- *Number of electric vehicle fires attended for the last 3 financial years.*
- *The duration of these incidents.*
- *The number and type of appliances sent to these incidents.*
- *The fire and rescue service suppression actions at these activities at these incidents (e.g. hose reel/main branch etc.)*
- *The water volume applied at these incidents.*

*If possible, please could you also inform me of the policy towards fire water containment at vehicle fire incidents (both internal combustion engine and battery energy vehicles) (e.g. whether this is standard practice). If possible, please could you provide data that supports this where available including:*

- *Number of vehicle fires attended for the last 3 financial years.*
- *Number of the above incidents where fire water containment measures (e.g., clay mats, booms, etc) were deployed.*
- *Number of the above incidents which were EV fires.*

**Response:**

We have some of this data published on the London Datastore, please see our report London Fire Brigade Incident Records here: [LFB Incident Data from 2018](#). This report can be filtered by year, incident type, property type etc and also shows the duration and number of appliances attended.

We also have a report that covers electric vehicles fires which can be found here: [Lithium and Electric Vehicle fires](#).

Please see the document attached which show the type of appliances sent to these incidents and the suppression actions at these activities at these incidents (e.g., hose reel/main branch etc.),

We do not hold data on the number of the above incidents where fire water containment measures (e.g., clay mats, booms, etc) were deployed or the water volume applied at these incidents.

We do not have a policy specifically about water containment from vehicle fires, but we do have LFB policy number 206 – Environmental protection which covers the LFB's actions in relation to preventing pollution of the water environment which can be viewed here: [Policy number 206 – Environmental protection](#).

We have dealt with your request under the Freedom of Information Act 2000. For more information about this process please see the guidance we publish about making a request on our website: <https://www.london-fire.gov.uk/about-us/transparency/request-information-from-us>
